[x] Yes [ ] No

If yes, please explain how you will address the disproportionality.

The data suggests that the district is disproportionate in one subgroup area for all three subjects because of a small N size. To address this issue of disproportionality, we will review our district's policies, practices and procedures to consider any necessary edits. We will also review each students' individual education plans and assessment needs as compared to the DLM Participation Guidelines. We will continue these reviews on an annual basis. Only students who meet the DLM criteria will be given the Alternate Assessment.

[X] **Please provide a narrative that includes the data types and processes that the IEP teams are utilizing to qualify students for the Alternate Assessments (DLM) in the box below and press Save.**

IEP teams use multiple sources of data to make decisions on state assessments for students. Student observations, review of records, individual assessments, adaptive behavior scales and interviews are all used to make best decisions for state testing. HPEC uses the DLM Participation Guidelines that were provided by KSDE to assess students needing alternative measures. In particular, IEP teams review data to assess:
Students' significant cognitive disability;
Students' significant deficits in adaptive behavior;
Students who are being primarily taught using the DLM Essential Elements as content standards; and
Students who require extensive direct individualized instruction support to achieve measurable gains in their curriculum.

In addition, evidence for the decision for participating in the DLM Alternate Assessment and the KAA is NOT based on the following:
A disability category or label
Poor attendance or extended absences
Native language/social/cultural or economic difference
Expected poor performance on the general education assessment
Academic and other services student receives

Student IEPs are reviewed annually and team discussions determine the most appropriate assessment option for each student.

[X] **What are the district's next steps to ensure that annually the appropriate test is administered to each student?**

The data suggests that the district is disproportionate in one subgroup area for all three subjects because of a small N size. To address this issue of disproportionality, we will review our district's policies, practices and procedures to consider any necessary edits. We will also review each students' individual education plans and assessment needs as compared to the DLM Participation Guidelines. We will continue these reviews on an annual basis.

Based on the data for our district, our LEA needs additional training.
