☐ **Please provide a narrative that includes the data types and processes that the IEP teams are utilizing to qualify students for the Alternate Assessments (DLM) in the box below and press Save.**

The IEP teams look as the following data to determine which assessment is used for each individual student: Cognitive testing data, achievement testing data, DLM qualification rubric, adaptive skills assessment, and they also look at the instruction given to each student.Students that qualify for the DLM are also receiving their instruction that is tied to the Essential Elements.

The DLM qualification rubric is completed prior and during IEP meetings. During the meeting, this data is shared along with the other assessment data. The IEP teams make the decision on instruction and assessment for each individual student.

☐ **What are the district's next steps to ensure that annually the appropriate test is administered to each student?**

IEP teams meet to discuss the appropriate instruction and assessments for student with the most significant cognitive disabilities. The DLM qualification rubric is used to determine if the DLM is the appropriate assessment for each individual student. The students that qualify for the DLM are also being instructed using the DLM Essential Elements. Assessments and instruction are an IEP team decision, but the data from the rubric is used to help drive that decision.

Based on the data for our district, our LEA needs additional training.

☐ Yes ☒ No

Our district anticipates testing over 1% of our students in one or more content areas during the school year.
