If yes, please explain how you will address the disproportionality.

At least annually NKESC provides training about qualifications for utilizing the DLM. This year NKESC had a state consultant on September 18 come in person to provide training. NKESC also utilizes a Google Classroom with reminders and training links for DLM procedures and processes. Staff are provided guidance from the KSDE Resources – Making Decisions about Participation in the Alternate Assessment Guide and Decision Tree. A DLM support staff member is available to assist teams in determinations for assessments and training support. [redacted].

☐ **Please provide a narrative that includes the data types and processes that the IEP teams are utilizing to qualify students for the Alternate Assessments (DLM) in the box below and press Save.**

In Oberlin the total population taking the Science assessment of [redacted] students and in Math and Reading [redacted] students complicates the percentages for the DLM. [redacted] NKESC administration reviews students taking the DLM and advises school personnel of “red flags” related to DLM use. When DLM procedures are not consistent with KSDE guidance teams are asked to correct the over-identification.

☐ **What are the district's next steps to ensure that annually the appropriate test is administered to each student?**

For each student considered a candidate for the DLM, IEP teams are asked to review the KSDE guidance and decision tree. They also fill out the DLM rubric with support of the team and have it signed. Test Coordinators are then to be contacted to ensure team decisions are consistent with assessment rosters. If it is noted either KSDE or team members that a student is possible incompatible in needs for take the DLM and concerns that a general assessment with accommodations is appropriate, NKESC administration communicates with school teams, school administration, and test coordinators to remedy or confirm DLM use. School wide participation and DLM percentages are reviewed. However, consideration to low school populations district to district comparisons are recognized as divergent or inconsistent.

Based on the data for our district, our LEA needs additional training.
