☐ **Please provide a narrative that includes the data types and processes that the IEP teams are utilizing to qualify students for the Alternate Assessments (DLM) in the box below and press Save.**

The IEP teams are utilizing data from the most recent evaluation for each student along with progress monitoring data based on student goals from their respective IEPs. This data is presented to IEP teams and they complete the rubric for determining student eligibility for KS alternate assessment (DLM) for students with the most significant disabilities. The district has updated the alternate assessment guidance document that is embedded into the IEP to reflect the most recent version of guiding questions and documentation. This form automatically prints for each IEP team to discuss and review the requirements for selecting the alternate assessment. The IEP team (which includes the parent) completes this form as a group and signs off on the final decision after careful consideration of this guidance document.

☐ **What are the district's next steps to ensure that annually the appropriate test is administered to each student?**

Each principal is given a print out of the students with IEPs who have been determined by the IEP team to qualify for the DLM assessment and they cross check that with the assessment records that they upload for these students.
Staff are instructed on utilizing the DLM guidance document and this rubric is completed at IEP meetings with the whole team along with parents. The information is reviewed with superintendents as well so they understand the eligibility criteria and the impact on administering the DLM to students in their districts. Teams sign off on the final decision for selecting the DLM for each student.

Based on the data for our district, our LEA needs additional training.
