| <b>1-104</b> | <b>Blood Borne Pathogens for School Bus Drivers: The Route to Safety</b> | In addition to staying safe on the road, school bus drivers have the job of keeping themselves and students safe from highly contagious bloodborne diseases like HIV and Hepatitis. This program covers how BBPs are spread and how to reduce the risk of infection as well as how and when to use PPE for protection.                                                                                       | 13 min    | 2005 | Personal Protective Equipment Use. Blood borne pathogens | N               | N      |
| <b>1-105</b> | <b>Children in Traffic</b>                                               | Children see the road differently from adults. How does children's development affect their perceptions of traffic? What behaviors should adults watch for when driving near children? This DVD presents real-life footage showing how children's perceptions of traffic differ from those of adults. It provides insight on why children behave unexpectedly and is a must-see for all drivers and parents. | 13 min    | 2010 | Children's perspectives of traffic and their actions     | N               | N      |
| <b>1-106</b> | <b>Dealing with Severe Disruptions</b>                                   | This video will help drivers identify potentially serious situations and will give them strategies to de-escalate problems and manage situations while maintaining student safety. It includes information on:<br>*What makes a disruption severe.<br>*How to identify potential problems.<br>*Dealing with disruptions effectively.                                                                         | 20 min    | 2006 | disruption identification, de-escalation, student safety | N               | N      |

| 1-108   | Difficult People: How to Deal With Them | Hostile customers. Unreasonable co-workers. Indecisive, vacillating bosses. Over-agreeable (but do-nothing) subordinates. You meet them everyday, and dealing with them, just to say the least, can be stressful. But it need not be, as long as you got the tricks to identify, understand and cope. This program examines useful skills in dealing with these so-hard-to-handle people. | 37 min    | 1989        | Identifying and dealing with difficult people.                                                        | N               | N      |
| 1-109   | Distracted Driving: At What Cost        | Most drivers are unaware of how often they are distracted from the most important task at hand driving the vehicle safely. This program is designed to raise a driver's awareness of the potentially tragic consequences of driving while distracted.                                                                                                                                     | 14 min    | Unavailable | Consequences of distracted driving                                                                    | N               | Y      |
| 1-110   | Driver Safety: The Blindfold Effect     | This is more than a "how-to" program, it's also a motivational film designed to affect the viewer's attitude about driving safety issues. The interactive format of this program is designed to encourage participation by asking viewers to identify and discuss the hazards depicted in the program.                                                                                    | 18 min    | Unavailable | *Driving hazards.<br>*Causes of rear-end collisions.<br>*Backing accidents.<br>*Intersection dangers. | N               | Y      |
| 1-111   | Dual Air Brakes                         | This video features a mock up of the dual air brake system. Instructor Bob Austin, from the California Department of School Transportation demonstrates the features.                                                                                                                                                                                                                     | 60 min    | 2003        | *Component Parts of the system.<br>*Pre trip inspection of the dual air brake<br>*Trouble shooting    | N               | N      |

| <b>1-129</b> | <b>Road Rage &amp; Aggressive Driving</b>                                                                                                                       | Road rage is deliberate, violent behavior by a driver in response to a real or imagined traffic grievance. Drivers may use their vehicles as weapons, or even get out of their cars to accost or attack another driver, leading to damage to personal and public property, and even murder. This timely program looks at road rage and aggressive driving from the driver's perspective. Viewers learn what to do if they are the object of an enraged driver and how to avoid becoming enraged themselves. Knowing what to do if confronted by a person who is enraged can mean the difference between life and death. | 20 min                                             | Unavailable | Road Rage                                                                                               | N                | Y      |

| 1-141   | So You Think You're Going to Live Forever | A unique message of laughter and tears for every young person who wants to drive, and live. Captain Pete Collins did not set out to become an award winning speaker. He was just a state trooper who felt the need to tell people about his experiences on the highways. The stories are not unique. Any state trooper could tell them, but Captain Collins mixes the laughter and tears of more than 23 years of patrolling the highways to bring a compelling message that young people...and their parents will not soon forget.                                                                                                                                                                                                                        | 33 min    | 1990 | Drunk driving                                           | N               | Y      |
| 1-143   | The Greatest Heartache You'll Ever Know   | <p>"If God will just bring the back, he can wear his hair anyway he wants." This heartbreaking plea from a man whose son was killed in an automobile crash is just one reason this video should be seen by every parent. It's a mixture of laughter and tragedy that brings home the importance of a parent-child relationship.</p> <p>Highway safety is an issue that affects all of us. According to the National Highway Traffic Safety Administration, drunk driving accidents claimed the lives of over 16,000 people in 2004. A 2% decline in fatalities from 2003 is due to a combination of tougher punishment for offenders, educational programs, and dedicated professionals spreading the word about how these tragedies can be prevented.</p> | 32 min    | 1990 | <p>*Parent-child relationship</p> <p>*Drunk driving</p> | N               | N      |

| 1-150   | Winter Driving: When The Rules Change | This program dramatically illustrates the importance of adjusting our driving techniques when winter rolls around.                                                                                                                                                                                                                                                                                                                                                                                           | 16 min    | Unavailable | <ul style="list-style-type: none"> <li>*Adjusting schedules for winter driving.</li> <li>*Maintaining good visibility.</li> <li>*Winter driving techniques.</li> <li>*Winter survival supplies and techniques.</li> </ul> | N               | Y      |
| 1-151   | Confidential Records                  | The subject of the importance of drivers knowing more about the use, and misuses, of student information when we are talking about emergencies on the school bus, or which impact the bus ride. For example, what does the driver do if there is an accident, and he or she doesn't know who to contact? What is a school transporter's responsibility if a sheriff wants the names and addresses of students who ride a particular bus? Shouldn't drivers be made aware of students with violent behaviors? | 15 min    | 1999        | Confidentiality                                                                                                                                                                                                           | N               | N      |
| 1-152   | Preventing Road Rage                  | This DVD teaches angry motorist to be calmer, more polite, and safer drivers. Designed to be used either by individuals or in classrooms.                                                                                                                                                                                                                                                                                                                                                                    | 20 min    | 1998        | <ul style="list-style-type: none"> <li>*Teaches drivers to be calmer and more polite, and safe drivers.</li> </ul>                                                                                                        | N               | Y      |

| 1-163   | School Trans. Security Awareness | <p>It's difficult to imagine the possibility that our school buses could become the targets of a security threat. But the facts are unambiguous. Buses are vulnerable to attack by hijackers, suicide bombers, and remotely detonated explosive devices. Bus operations, including school buses, have been and will continue to be targets of those who use violence to promote their agendas. Every day 25 million children across the United States ride buses. Recent world events have shown us that international terrorists make no distinction between civilian and military targets. In fact, some terrorist groups have shown their willingness to use children and schools as targets.</p> <p>That's reality. But accepting reality doesn't mean living in fear. By applying the awareness and knowledge you'll gain in this training program, you can reduce the threat of security incidents on school buses. By working together, you can take the right actions to keep your public school transportation system safe for all your children.</p> <p>Now, what about your school system? How do you think the story would end if a similar incident occurred on one</p> | 26 min    | 2006 | <p>*Terrorism prevention</p> <p>*Transportation safety measures pertaining to terrorism.</p> | N               | N      |

| 1-167   | Small Falls Are A Big Deal | There are some places you just know you don't want to fall down from - the top of a 300 ft cliff or metal stairs leading up to the top of a 100 ft. oil tank. If you fall down something like that, you just know your going to be seriously injured if you survive at all.<br>2. These types of falls are known as "killer" falls.<br>3. "You don't have to fall 100 ft. to have a serious injury or a killer fall.<br>4. It could be as mundane as slipping on some ice in the parking lot or as simple as tripping over a pallet on a loading dock or rushing down a few stairs. | 19 min    | Unavailable | * Falls<br>*Proper Footwear<br>*Recognizing/Controlling Fall Hazards<br>*Keeping work areas safe | N               | N      |
| 1-168   | Think & be Safe            | While working as a paramedic and firefighter, Martin Lesperance frequently hears injury victims say "I just wasn't thinking" or "I didn't think." Martin uses his on-the-job experiences to show that taking a moment to think and act on safety can make a huge difference in our lives and the lives of our families.                                                                                                                                                                                                                                                             | 17 min    | Unavailable | *Workplace safety<br>*Repercussions of our actions<br>*Correcting safety problems immediately    | N               | N      |
| 1-169   | What Would You Say?        | This powerful program illustrates how to effectively communicate with our co-workers when we see them behaving unsafely. Featured are three potentially hazardous workplace incidents in which workers confront co-workers about their unsafe behavior. In each incident, examples of poor communication are demonstrated. Effective communication techniques are then exhibited that correct the unsafe behavior.                                                                                                                                                                  | 16 min    | Unavailable | *Effective Communication.<br>*Co-Worker Safety.                                                  | N               | N      |

| 1-170   | Crisis Preparedness For Schools                                 | Help your staff create a solid emergency team that will be more than ready to handle the unexpected. This program covers hazard assessment, explains crisis management, and discusses prevention and preparation.                                                                                                                                                                                                                                                                          | 18 min    | 2006 | *Hazard Assessment<br>*Crisis Management                                                                                                                        | N               | N      |
| 1-173   | Defensive Driving Skills For School Bus Drivers                 | What should a bus driver do when their bus is descending a hill too quickly? How do you retain control of a bus, following a blowout? When driving in sleet or snow, what should a bus driver be looking for? What are the differences between driving at night, versus driving during the day? How can a driver avoid blind spots, when approaching or leaving a loading zone? These are only a few of the issues that this video addresses. Ideal training for any level of bus drivers. | 24 min    | 2008 | Training for unexpected situations while driving a bus<br>*Controlling a bus after a blowout<br>*Descending a hill too quickly<br>*Day driving vs night driving | N               | N      |
| 1-174   | Transporting Students With Special Needs: Don't Lose Your Touch | Special needs students may rely on touch to communicate to others. School bus drivers who are responsible for these students must promote safety and foster healthy relationship connections. This program discusses how to use touch to convey respect and concern, for attention and calming, and to restrain or teach special education students.                                                                                                                                       | 17 min    | 1995 | Using touch to interact with special needs students                                                                                                             | N               | N      |

| 1-196   | Risky Business                             | <p>You probably don't think of motor vehicle crash statistics when you're getting into a car with a group of friends -- but you should be aware of them. Why?</p> <p>In 2003, teenagers accounted for 10% of the US population, but comprised 13% of motor vehicle crash fatalities. A total of 5,691 teenagers died that year, and speeding only makes things worse. nearly one-quarter of the people who died in speed-related crashes were between ages 15 and 20. Boys stand a greater chance of dying in a motor vehicle crash than girls. For example, 66% of the deaths in 2003 were males.</p> <p>What's more, the larger the group of friends in that car, the greater the risk for being involved in a fatal collision. If you are driving with one of your friends in the car, you are 1-1/2 times more likely to be involved in a fatal crash than if you were alone. Add another friend, and the risk increases again. Bring along three of your friends, and you are 3 times more likely to be involved in a traffic fatality.</p> | 30 min    | 2007 | <p>*Motor Vehicle Crash Statistics</p> <p>*Teenage Driver Fatalities</p> <p>*Teenage Driver Crashes</p> | Y               | Y      |
| 1-197   | First Aid Training for School Bus Driver's | When a medical issue occurs on a school bus, bus drivers must learn what actions to take. This 9 part video highlights the most important areas of first aid safety.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             | 27        | 2008 | First aid                                                                                               | N               | N      |

| 1-202   | City and Country Driving           | This program covers the different driving skills required for driving in urban, suburban and rural areas and along the roads and highways that connect these areas.                                                                                                                                                                                                                               | 18 min    | 1996 | Urban, suburban, and rural driving skills                                                   | N               | N      |
| 1-203   | Brakes and Braking                 | This program details how the different types of brake systems work and how to test air brakes and hydraulic brakes. The program also covers the effects of traction, resistance and braking time on stopping, and what to do in the event of brake failure.                                                                                                                                       | 6 min     | 1996 | *Types of brake systems.<br>*How to test airbrakes and hydraulic brakes.<br>*Brake failure. | N               | N      |
| 1-204   | You and Your Bus - The Perfect Fit | Everybody sees differently. This video program shows a simple exercise to determine each driver's depth perception. Once all your drivers have done this brief exercise, it will become clear to them why you stress that each driver must learn about and set up his/her own bus to fit themselves. The program also covers setting up the seat for proper driving, blind spots, and mirror use. | 19 min    | 1995 | *Depth Perception<br>*Proper seat set up<br>*Blind Spots<br>*Mirror Usage                   | N               | N      |
| 1-205   | In Less Than A Second              | This program shows a graphic presentation of what happens in the first seconds after a vehicle collides with a stationary object at 55 MPH. It also covers various formulas for how to calculate reaction time and stopping distances at various speeds, and how to maintain a proper vehicle interval.                                                                                           | 13 min    | 1995 | Reaction time, results time                                                                 | N               | Y      |

| 1-216   | School Crisis Planning Intruder Drill | Help your staff prepare for school crises with this course, which outlines the dynamics of the drill process, from pre-planning to post-drill procedures. It explains staff roles and responsibilities for each stage, cites safety measures, and explores how the crisis plan integrates individual and community efforts in the face of emergencies.                                                                                                                                                                                                                                                   | 14 min    | 2007        | *Crisis planning.<br>*Staff roles and responsibilities during a crisis.<br>*Crisis drills | N               | N      |
| 1-217   | Power Lift: Lifting That Works        | Most workers have been instructed to lift objects safely by using the "old way" of lifting. Unfortunately, this method contains many flaws that result in unnecessary and very harmful stress on our backs. To eliminate the harmful effects of this way of lifting, Dr. Mike Schaefer, a licensed orthopedic and chiropractic doctor, has developed the <i>PowerLift</i> technique. This program demonstrates how to combine various lifts and postures associated with Dr. Schaefer's <i>PowerLift</i> technique to overcome the real world challenges presented by many material handling situations. | 19 min    | Unavailable | *Proper lifting technique                                                                 | N               | N      |

| 1-220   | Defensive Driving : I could See It Coming | After automobile accidents, phrases like "I didn't see them coming" or "they came out of nowhere" are common. This defensive driving video can provide driving education on how to correct a range of common driving mistakes, as well as teaches drivers the importance of awareness on the road. It covers such topics as: safety cushions, inclement weather, visual road scanning, stopping distance, pre-trip inspections, avoiding distracted driving, and much more. A must have for any manager whose employees are on the road, and a must see for any driver. | 14 min    | Unavailable | <ul style="list-style-type: none"> <li>*Defensive Driving</li> <li>*Safety Cushions</li> <li>*Inclement Weather</li> <li>*Pre-trip Inspections</li> <li>*Distracted Driving</li> <li>*Visual Road Scanning</li> <li>*Stopping Distance</li> </ul>                                                                                               | N               | N      |
| 1-221   | Trucks, Vans & Other Delivery Vehicles    | This highly effective video gives drivers training on how to safely operate delivery vehicles before, during and after a delivery. Awareness, practicality and common sense and emphasized in the driving safety tips given.                                                                                                                                                                                                                                                                                                                                            | 16 min    | Unavailable | <ul style="list-style-type: none"> <li>* Pre-Trip Inspections</li> <li>* Loading Dock Safety</li> <li>* Proper Backing &amp; Turning Techniques</li> <li>* Truck Stopping Distance</li> <li>* Proper truck driving techniques for vehicles carrying heavy loads and or passengers in inclement weather and hazardous road conditions</li> </ul> | N               | N      |

| <b>1-222</b> | <b>Distracted Driving: Real Accidents, Real Stories</b> | We will follow the personal stories of workers and their families whose lives have been affected by distracted driving accident. Each story is unique, yet the common thread is the far-reaching impact of becoming distracted for even one second on the road. The distractions discussed include cell phones, paperwork, and on-board computers, among others. Each story becomes a teaching scenario WHERE all viewers will learn through distracted drivers training, the actions that could have prevented each incident. These realistic situations have a strong impact and make the lessons in this driving safety course easy for viewers to identify with and learn from. | 16 min    |             | *Distracted driving<br>*Cell phones & on-board computers<br>*Paperwork                                             | N               | Y      |
| <b>1-223</b> | <b>Driving Distractions of the Everyday Driver</b>      | In this driving safety training video, viewers will become familiar with common driver distractions like cell phone driving, from creating unsafe situations on the road, and how to prevent them from affecting their safe driving practices. Topics covered include: safe and effective use of comfort controls, GPS technology and cell phones, as well as how to handle additional unexpected distractions inside and outside of the vehicle.                                                                                                                                                                                                                                   | 18 min    | Unavailable | *Using comfort controls safely<br>*GPS technology<br>*Cell phones<br>*Unexpected distractions outside the vehicle. | N               | Y      |

| 1-224   | Why We Drive The Way We Do | This presentation is for experienced drivers who would benefit from learning why we make the mistakes we make out on the road. The video will help with general drivers training and will provide viewers with an understanding of what it means to be a professional driver. Driving safety tips are given and the risks drivers take on a daily basis will be individually identified. Drivers will be taught how to minimize distractions and to remember why defensive driving should be their number one job.                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 12 min    | Unavailable | *Driver Safety Tips<br>*Risks drivers take daily<br>*Minimize Driving Distractions<br>*Defensive Driving | N               | N      |
| 1-225   | The Extreme Driving Quiz   | This amazing film covers drivers going the wrong way, dealing with road rage, driving distractions, escaping from a submerged vehicle, how to help someone that is trapped in a vehicle on fire, dealing safely with a carjacker, what to do if locked in the trunk of a car, how to handle a fender bender, what to do if the breaks fail, what to do when you meet a drunk driver on the road, what to do to try and stop your car from rolling over and what to do if it does, dealing with a stall on the train tracks, how to survive a pile-up crash that you are headed towards, how to handle extreme fog, how to survive being struck by lightning in a car, what to do when hail gets large enough to break your windows while driving, surviving a tornado about to hit your car, and helpful tips to deal with other situations that we all dread being in. With pictures and video of vehicles in these situations, this film is a must see for all drivers. | 45 min    | Unavailable | *Extreme Driving Situations<br>*Road Rage<br>*Accidents<br>*Weather conditions                           | N               | Y      |

| 1-226   | Fatal Stop                               | This program is designed to develop awareness in the viewer of why pre-trip inspections are required and the potential consequences of not doing a thorough inspection every time a bus is to carry students. In this reenactment of actual occurrences, a field trip ends prematurely with an overturned bus and bleeding students. We go back through the events that lead up to the tragedy. We see that the driver did a poor pre-trip inspection, not only on the bus, but also of himself. During the unfolding story, we examine each element if the pre-trip inspection and discuss the "what-if's". | 24 min    |             | Pre-trip inspection                                                                                                                             | N               | N      |
| 1-227   | Cure for Conflict                        | This program deals with discipline problems for Jr. and Sr. High School students, since this age group tends to pose the largest discipline problems. The program will teach viewers how to improve their leadership skills and understand of the constructive ways to handle discipline problems.                                                                                                                                                                                                                                                                                                           | 31 min    | Unavailable | *Transportation through the eyes of the student and the bus driver.<br>*Discipline-handling skills.                                             | N               | N      |
| 1-228   | School Bus Drivers Positively in Control | This program tackles the issue of school bus driver attitude and how it can directly affect safety. Training tips include examples of preventive measures drivers can take to help improve the safety of students and provide safe bus operation.                                                                                                                                                                                                                                                                                                                                                            | 13 min    | 2000        | *Attitude pre-inspection.<br>*Being a positive role model.<br>*Control student behavior.<br>*Safe loading & unloading.<br>*Leave stress at home | N               | N      |

| 1-235   | Someone Who Made a Difference | How much of an impact does a bus attendant or bus driver have on children? This unique video takes place in the not too distant future, as a high school senior works on her college application. As she works on an essay, the student recollects how an attendant touched her life at a very difficult time in her childhood. Guaranteed to stimulate discussion and reflection in your frontline transportation staff about attitude, professionalism, and caring.                                                                                                                    | 16 min    | 2003 | *Making a difference with the student on the bus<br>*Attitude<br>*Professionalism<br>*Caring | N               | N      |
| 1-236   | If Buses Could Talk           | This humorous and provocative new video imagines what buses might say about their drivers if buses could talk. We "overhear" a veteran and a rookie bus as they express real faith in the driving skills and talents of their drivers but are deeply perplexed by the morale problems they've seen recently. This video, which explores a number of scenarios involving drivers relating to each other in the break room, will get your drivers laughing, talking and thinking about the relationship between morale, professionalism and safety. Includes written discussion questions. | 16 min    | 2003 | Drivers and morale                                                                           | N               | N      |

| 1-245   | Driving Distraction of the Professional Driver | This distracted driving training video will help to improve safety among those who drive your fleet. In this presentation on how professional drivers can prepare for safe driving, drivers will learn how to refine their driving skills while on the road. The material covered in this driving safety training video displays the host of possible distractions professional drivers face and how to avoid them. Safety practices like pre-trip planning, knowing how to handle unexpected inclement weather and handling everyday driving hazards on the job are just a few of the practices covered. | 18 min    | Unavailable | *Distracted driving<br>*Refine driving skills while on the road.<br>*Pre-trip planning<br>*Unexpected inclement weather.<br>*Everyday driving hazards | N               | N      |

| 1-253   | Beating a Blowout                  | When a tire blows, proper action by the driver can prevent a more serious accident. This video outlines the simple but important rules to follow when a blowout occurs.                                                                      | 4 min     | 2004 | Tire blowout guidelines                                                          | N               | Y      |
| 1-254   | Cellular Phones and Two-Way Radios | Cellular phones and two-way radios offer great benefit, but may also create distractions that increase a driver's risk. When on the road, it's important to concentrate on safe and defensive driving, and not on making or answering calls. | 7 min     | 1992 | When to use cell phones and two-way radios.                                      | N               | N      |
| 1-255   | Stay Low, Stay Alive               | In most fires, smoke and toxic gases are the real killers. Victims seldom see the flame. Smoke is an angry vengeful menace which demands respect, or it will kill.                                                                           | 6 min     | 2002 | *Smoke from fires                                                                | N               | N      |
| 1-256   | The Moment of Impact               | Automobile accidents cause nearly half of all accidental deaths in the US. This Safety Shorts video shows you what to do after an accident to make the best of a bad situation.                                                              | 6 min     | 1991 | *Automobile accidents<br>*What to do after an accident occurs                    | N               | Y      |
| 1-257   | Pulling Trailers                   | When you tow a trailer, you face new and different challenges on the highway. Follow safe procedures to ensure your safety and the safety of others.                                                                                         | 7 min     | 1992 | * Towing<br>* Trailer Preparation<br>* Knowing how to handle your vehicle safely | N               | N      |

| 1-267   | Days of Summer Safety (101 Days) | From the Memorial Day weekend through the Labor Day holiday, we enjoy all types of warm-weather events, but summer is also a critical time for injuries. In fact, more mishaps occur during these 101 days than they do the rest of the entire year.                                                                                                                                                                                                                                                                                                                     | 20 min    | Unavailable | <p>and driving safety in the summer.</p> <p>*Prevent sunburn and other heat-related illnesses.</p> <p>*Prevent injuries in summertime sports.</p> <p>*Safely barbecuing, doing yard work and other summertime events.</p> <p>*Precautions to take when swimming, boating and operating personal watercraft.</p> | N               | Y      |
| 1-268   | Safety Most Wanted               | <p>In this episode of Safety's Most wanted, we investigate the tendencies and modes of operation of three injury instigators: Uncorrected Hazards, Shortcuts and Complacency. Through undercover interviews, victim statements and reenactments, viewers will see how these culprits contribute to injuries and fatalities in our workplace and homes.</p> <ol style="list-style-type: none"> <li>1. Each instigator's MO - Method of Operation</li> <li>2. Reenactments of each culprit's dastardly deed.</li> <li>3. | 1-281   | Driving Safely: Reason On the Road | This video utilizes the S.A.F.E. system to emphasize defensive driving safety. It shows drivers the importance of alertness and time for the proper planning and execution of their driving maneuvers. It also outlines how distracted driving and bad weather driving can make planning and safety more challenging. This safety driving video also warns the viewer against texting while driving, eating while driving, and covers road rage online. A fast-paced, engaging ride - this film                                                                    | 15 min    | Unavailable | *S.A.F.E system<br><br>*Defensive driving safety.<br><br>*Distracted driving                                                                                                                                           | Y               | Y      |
| 1-282   | Every 15 Minutes                   | This made for TV, all-star cast includes Tim Allen, Craig T Nelson and others hosting dangerous driving scenarios. Multiple-choice questions are posed and answered while real life accidents are shown. Topics covered include: Road rage, defensive driving, distractions while driving, cell phone driving, inclement weather, stopping distances, winter driving tips, eating while driving accidents, following too closely, bad driving habits, and other safe driving tips that should keep driving fines to a minimum and employees out of driving school. | 15 min    | Unavailable | Dangerous driving scenarios:<br>*Road rage<br>*Defensive Driving<br>*Distracted driving<br>*Cell phone us why driving<br>*Inclement weather<br>*Stop distances<br>*Winter Driving<br>*Accidents<br>*Bad driving habits | N               | N      |

| 1-308   | Driver Awareness                                         | This program puts viewers "in the driver's seat" as they watch 35 different moving traffic scenes playing out in the front of them through the windshield of "their"                                                                                                                                                                                                                                                                                                                            | 35 min    | Unavailable | Traffic scenes play out in front of viewers as they watch through their windshield | N               | N      |
| 1-309   | Understanding The Dysfunctional Family                   | Not all the challenges of special needs transportation involve the students - many drivers will say that sometimes the greatest challenge is dealing with the parents of riders with disabilities. This program gives a better understanding of the stress and emotional problems that sometimes lead to a parents' uncooperative or hostile behavior. The driver who learns to be patient and understanding of both passenger's and their parents can reduce or even eliminate these problems. | 21 min    | 1993        | *Special needs transportation<br>*Rider's parents<br>*Aggressive behavior          | N               | N      |
| 1-310   | Sexuality & Socialization For Students With Disabilities | A twenty-two-year veteran driver trainer and specialist in working with people with disabilities, deals with the subject of sexuality on a special needs bus in a frank, factual manner. Trainers often find this a difficult subject to handle but this DVD simplifies your task.                                                                                                                                                                                                              | 9 min     | 1993        | Sexuality on a special needs bus                                                   | N               | N      |
| 1-311   | Transporting Students with Orthopedic Disabilities       | This DVD training program dramatically demonstrates for your drivers and attendants the limitations and challenges riders with orthopedic disabilities face each and every day.                                                                                                                                                                                                                                                                                                                 | 8 min     | 1993        | *Challenges associated with transporting students with orthopedic disabilities     | N               | N      |

| 1-317   | Student Management          | <p>Student behavior is always a challenge. Drivers will learn techniques for student management and the differences in student behavior as they progress through the grade levels. A principal shows how this program combined with a thorough understanding of the procedures used by your school district will help make the driver's job easier and safer.</p> <p>Also, this video shows drivers and attendants there is no "magic potion" for student management - it takes hard work to get the job done. Six suggestions are explored, which, when put in place, reinforced and enforced, can change a chaotic bus environment into a safety culture.</p> | 20 min    | 2010 | <p>*Student Behavior</p> <p>*Student management techniques</p>   | N               | N      |
| 1-318   | Guns On The Bus             | Features a compelling and instructional interview with a bus driver who experienced a student discharging a handgun on his bus. Learn what happened and how he handled this volatile situation.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | 30 min    | 1996 | Students discharging handguns on the bus.                        | N               | N      |
| 1-319   | Growing Respect On Your Bus | "Growing Respect On Your Bus" teaches drivers and attendants the importance of establishing a respectful, secure, bully-free school bus environment. Draws on the experience of nationally recognized anti-bullying experts and the success of drivers and attendants. Includes discussion questions and suggestions for preventing bullying and harassment.                                                                                                                                                                                                                                                                                                    | 30 min    | 2005 | How to establish a respectful secure bully free bus environment. | N               | N      |

| 1-347   | Fire Extinguisher Basic Training               | Workplace fires can happen at any time. That is why it is important to know what to do when a fire starts -- know when and how to fight it and when not to. This program will provide viewers with the basic information they need to react safely in a potentially dangerous situation involving a fire.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      | 13 min    | Unavailable | <p>*When to use a fire extinguisher.</p> <p>*Using the PASS method to put out a fire</p> <p>*Fire extinguisher inspections, maintenance, and storage.</p>                                                                                                                             | N               | N      |
| 1-348   | Understand & Preventing Heat-Related Illnesses | As hot conditions intensify this summer and we continue to perform our regular job duties, the potential for heat-related illnesses rises dramatically. Collectively known as heat stress, these illnesses are serious and can even cause death in some cases. Your employees must be vigilant in their efforts to prevent them. This safety video program discusses how hot conditions affect the human body, the symptoms of heat-related ailments and what to do if we start to experience them, how to treat victims of heat stress and most importantly, the precautions that must be taken to avoid problems when working in hot environments. Other topics include becoming acclimated to the heat, use of the buddy system, preventing heat stress at indoor facilities and specialized clothing and protective devices for working in hot conditions. | 16 min    | Unavailable | <p>*How heat affects the body</p> <p>*Symptoms of heat-related ailments</p> <p>*What to do if experience any of the symptoms of heat stress.</p> <p>*Precautions to take to avoid heat related ailments.</p> <p>*Buddy system</p> <p>*Special clothing</p> <p>*Protective devices</p> | N               | N      |

| 1-353   | (#1) Vehicle Handling/Upkeep: Idling<br>(#2) Fire Extinguishers     | (#1) Discusses the impact of idling on school bus fuel economy, ways to reduce idle time, and the impact of idle time reduction on fuel. It details proper procedures for integrating reduced idle time into typical school bus driving.<br><br>(#2) Covers common sense causes of school bus fires, reminding drivers to do a thorough pre-trip.                                                                                                                                                                                                                                                                       | 4 min & 3 min                          | 2011 | (#1) idling, ways to reduce idle time<br><br>(#2) causes of school bus fires and emphasis on pre-trip | N               | N      |
| 1-354   | Part #1<br>Emergency Evacuation<br><br>Part #2<br>Railroad Crossing | (#1) Preparation is critical for the emergency evacuation of a special needs bus. Decisions must be made in advance about how to get the students off the bus, who will help whom, what equipment must be moved and where they will go. Many districts don't conduct drills for evacuation of special needs students but drivers must have a plan ready and discuss it with their riders.<br><br>(#2) This video stresses the importance of approaching railroad crossings with great caution. It also covers warning signs for railroads and coming trains, and the three-part procedure for crossing railroad tracks. | Part 1<br>6 min<br><br>Part 2<br>5 min | 2011 | *Evacuation of Special needs bus.<br><br>*Railroad crossings                                          | N               | N      |

| 1-369   | Red Asphalt V                                                 | <p>This latest video is hosted by a teenager and is primarily intended to influence teen attitudes toward safe driving, although most adults would surely benefit from viewing it as well. There are 42,000 people killed each year in the US as a result of car crashes. That's equivalent to the loss of two jumbo jets every week.</p> <p>The video points out that the number one cause of death for teens is car crashes. There are more than a dozen graphic scenes of dead motorists. It is probably the most graphic of all the Red Asphalt videos and promises to be the most effective. There are several interviews with the families and friends of the victims displaying the devastating effect that the death of their loved one has had on their lives. This video is sure to catch the attention of the viewer and will hopefully lead</p> | 16        | 2005 | <p>*Safe Driving</p> <p>*Car crashes being #1 cause of death for teens.</p>                                                                                                                   | N               | Y      |

| 1-373   | Wireless Phone & Responsible Driving | This most amusing animated video asks and answers some basic questions about when it is ok and when it is not to use your cell phone while driving. Amazingly, the following statement came from the 1930 Farmer's Almanac ... "Some states don't want to permit RADIOS in cars at all. Radios distract the driver and disturb the peace." Of course, radios are in virtually every automobile currently produced, but it is an interesting fact that even today many vehicle accidents occur while someone is trying to change the station or inserting a cassette or CD into the radio player. If radios produce accidents, you can imagine how much more dangerous the use of cell phones is while driving an automobile, especially taking into account the many distractions what we face in today's world. This very funny video will encourage proper use of cell phones while keeping your audience entertained at the same time. | 12        | 2001 | *Use of cell phones while driving<br><br>*Accidents due to distraction of cell phones    | N               | Y      |
| 1-374   | Backing Safely                       | Backing is the cause of a large number of collisions-a disproportionate number -since drivers spend a relatively small amount of time actually backing. And although speeds are normally low, these collisions not only create inconveniences, they cause significant property damage and even personal injury. This video offers practical safety information that can help drivers eliminate backing collisions.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        | 13        | 2006 | *Steps for a safe back.<br>*Tips to avoid backing.<br>*Procedures for backing with help. | N               |        |

| 1-376   | Highway of Agony<br><b>NOT recommended for children under the age of 14</b> | <p>This is a most disturbing video, but it's supposed to be. It's nearly 4 decades old but still powerful and extremely graphic. The opening screen sets the pace: <b>"Due to the graphic nature of this video it is not recommended for children under the age of 14."</b> It has been many years since the films were taken but the impact is tremendous. In fact, it might be pointed out that this was an era when few automobiles had any kind of restraint device installed, so consequently, many drivers and/or passengers were ejected in the course of a crash. Many safety features that are now standard equipment on most cars were non-existent.</p> <p>An ambulance was slow to arrive and there were no paramedics or emergency medical personnel standing by to be called into action. Crash victims often died before any medical help arrived. We've come a long way with many improvements in safety features for automobiles, safety awareness programs, better highways and roads, and added law enforcement.</p> <p>However, there is still death and injury on our roadways and video brings the message home in dramatic fashion.</p> | 20        | 1975 / 2003 | <p>*Traffic Accidents</p> <p>*Drinking and Traffic Accidents</p> | N               | N      |

| 1-377   | Signal 30        | <p>The automobiles are from the '50s and the commentator's voice is delivered with an ominous monotone, but the words still have the same meaning today. The crash scenes are stomach turning and graphic, and anyone who views this DVD will experience an unforgettable sensation; watching and listening to death, the screams of the seriously injured, the loading of a body bag.</p> <p>This "mother of all traffic safety" films was taken on-the-scene and many before any emergency medical help arrives. Every scene shows the grizzly results of speeding, drinking and driving, and engaging other dangerous driving activities. At first, it may seem cruel, cold and harsh to make someone watch this tape, but is there a better lesson on carelessness? Warn the audience, and then watch their reaction to carnage on the highway. It's a very powerful message. Painful to watch but absolutely unforgettable and sure to leave an indelible message for all drivers who view it.</p> | 30        | Unavailable | <p>*Crash scenes resulting from:</p> <p>*Speeding</p> <p>*Drinking and Driving</p> <p>*Engaging in Dangerous</p> <p>*Activities while driving</p> | N               | Y      |
| 1-378   | Sharing The Road | Helps motorists understand the special concerns and dangers face by pedestrians, truck drivers, motorcyclists, bicyclists, and ambulance drivers. Presents specific tips on how to reduce the risks of sharing the road.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | 9         | 1994        | Reducing risks when sharing the road.                                                                                                             | N               | Y      |

| 1-379   | Night Driving                                        | The loss of light makes night driving much more dangerous. In the distance, you only see the lights, reflections, and shadows. Impaired drivers are out in greatest numbers at night. At night a driver must know how to make the most of what little light is available. The video gives interesting and important facts about night driving that a driver may never have considered. | 9         | 1994        | Night Driving                                                                                                                                                                                    | N               | Y      |
| 1-380   | Passing & Changing Lanes                             | Do you know how it should be done, legally and safely? Shows the strategies for travel on multi-lane highways and for travel in two-way traffic. Also, shows what to do when being passed.                                                                                                                                                                                             | 7         | Unavailable | *Legally and safely passing and changing lanes on<br>-Multi-lane highways<br>-Two-way traffic<br><br>*What to do when being passed.                                                              | N               | Y      |
| 1-381   | Rural Driving: Not Just Another Drive In the Country | This video covers the big differences between city and rural driving. Some of the topics covered include speeding, merging onto the roadway, passing, driving in curves and hills, cell phones, drowsy driving, slow moving vehicles such as tractors and other farm equipment, night driving, animals, railroad crossings.                                                            | 13        | Unavailable | *Speeding<br>*Merging onto roadway<br>*Passing<br>*Driving on curves and hills<br>*Cell phones<br>*Drowsy driving<br>* Slow moving Vehicles<br>*Night driving<br>*Railroad crossings<br>*Animals | N               | Y      |

| <b>1-382</b> | <b>Deadly Driving Distractions: Texting, Cell Phones, and Other Killer</b> | According to insurance statistics, distracted drivers are responsible for almost 80% of all car crashes and 65% of near-collisions in the United States. This video helps students steer clear of the dangers resulting from driving while texting, talking on cell phones, eating, smoking, and other distractions. Forgoing the traditional host-and-interview format, the program uses conversations with teens and college students who share their thoughts on the subject while driving instructors and other educators explore safe driving methods. In addition, people with firsthand knowledge-such as emergency room personnel and car crash survivors-offer their cautionary advice. | 25 min    | 2010 | Driving while using<br>*Cell phones<br>*Eating<br>*Smoking<br>*Other distractions | N               | Y      |
| <b>1-383</b> | <b>Another Smash Hit</b>                                                   | The National Safety Council estimates that at least one million crashes (28%) are caused by using cellphones and texting while driving each year. If you text and drive a serious accident is inevitable. This DVD teaches drivers about the consequences of texting and driving.                                                                                                                                                                                                                                                                                                                                                                                                                | 12 min    | 2011 | Texting and Driving<br>*Accidents resulting from it<br>*Consequences of           | N               | Y      |

| <b>1-404</b> | <b>The Critical Point, Bus Version</b> | This is a two-part presentation that can be viewed in one or two sessions. Part One introduces our time-tested 5 Keys and explores ways drivers unknowingly relinquish control over their own safety. This powerful knowledge provides the critical thinking needed in Part two for viewers to participate in analyzing, from an aerial view, common driving patterns that expose motorists to unnecessary risks. This video offers an unparalleled insight into their daily traffic surroundings, while refreshing and enhancing the safety knowledge of the veteran user. | 31 min    | 1998        | Refreshes and enhances the safety knowledge of the veteran driver.                                                            | N               | N      |
| <b>1-405</b> | <b>I Can't Get No Traction</b>         | This upbeat music video spotlights common slip, trip and fall hazards in unique and entertaining fashion. Inspired by the Rolling Stones tune, "Satisfaction," the custom lyrics to this music video provide a warning to those workers who move about the workplace in an unsafe manner. The program features a variety of realistic slip, trip and fall stunts that teach memorable lessons on distracted walking, running, poor housekeeping, improper ladder use, spills, moving equipment and wearing improper footwear.                                               | 4         | Unavailable | Distracted walking, running, poor housekeeping, improper ladder use, spills, moving equipment, and wearing improper footwear. | N               | N      |

| 1-409   | Transportation Information Form (Part 1)<br>Routing & Scheduling (Part 2) | <p><b>PART #1</b> - Communication on a regular basis is critical to the team approach of meeting the needs of special needs students. In this video, school bus drivers are reminded of what information is needed, who is responsible and how it is important to the special needs students.</p> <p><b>PART #2</b> - In order to provide service for the special needs student that assures curb to curb delivery, schools must carefully plan routes and schedules. The need for additional specialized equipment may be a factor that affects timely transportation. Drivers have to provide the school information about the students' needs and routines to assist in this process</p> | <p><b>Part #1</b><br/>7 min</p> <p><b>Part #2</b><br/>17 min</p> | 2011                                                        | <p>Communication</p> <p>Part#1<br/>Special need students<br/>Information Needed</p> <p>Part #2<br/>Planning routes and<br/>scheduling for the<br/>special needs</p> | N               | N      |
| 1-411   | Disciplinary Procedures (Part #1)<br>Emergency Evacuations (Part #2)      | <p><b>PART #1</b>-Dealing with student management is a challenge for any school bus driver, but especially so for those transporting special needs students. This video offers a straight forward discussion of what drivers and attendants can and can't do.</p> <p><b>PART #2</b>-Preparation is critical for the emergency evacuation of a special needs bus. Decisions must be made in advance about how to get the students off the bus, who will help who, what equipment must be moved and where they will go.</p>                                                                                                                                                                   | 10                                                               | <p>Part #1:<br/>10 minutes</p> <p>Part #2<br/>6 minutes</p> | <p>*Student management on special needs bus.</p> <p>*Emergency evacuation of a special needs bus.</p>                                                               | N               | N      |

| 1-421   | Active Shooter: Helping Prevent Tragedy | Incidents involving active shooters continue to be in the news. These acts of violence are becoming more commonplace in today's society, and although your chances of being a victim of an active shooter incident are miniscule, it is important your organization and your associates plan and be prepared for such an incident. Active shooters can strike where we live, where we work, where we study, where we shop or any other environment. No business or institution is immune to the potential of an active shooter attack. | 8 min     | Unavailable | Active Shooters                                                                                                                           | N               | N      |
| 1-422   | Impact After the Crash                  | This video explores the horrific Carrolton, Kentucky, bus crash of May 14, 1988, which killed 27 people (mostly children) and injured nearly three dozen others making it the worst drunk-driving related crash in America history.                                                                                                                                                                                                                                                                                                    | 81 min    | 2013        | Drunk driving accident involving a school bus.                                                                                            | N               | N      |
| 1-423   | Getting to School Safely                | Learn the basics of safe walking, bicycling, and riding in an automobile to school. Discover the importance of using crosswalks, obeying the crossing guard, not accepting rides from strangers and many more tips.                                                                                                                                                                                                                                                                                                                    | 15 min    | 2004        | Basics of getting to school safely by walking, biking, or car.<br><br>*Using crosswalks, obeying crossing guards<br><br>*Stranger danger. | Y               | N      |
| 1-424   | School Bus Safety                       | A combination of songs, graphics, and role-playing students about school bus safety. Learn how to be safe on the way to the bus and at the bus stop. Understand appropriate behavior while riding the bus, and learn how to get on and off the bus safely.                                                                                                                                                                                                                                                                             | 13 min    | 1997        | *Teaches students how to be safe on the way to the bus and at the bus stop.                                                               | Y               | N      |

A friendly fireman demonstrates through music videos how to keep your home safe from fires. Also includes information what to do in case of a fire and how to plan fire escape routes in your home.                                                                                                                                                                                      | 10 min    | 2004 | Teaching children about fire safety.          | Y               | N      |
| 1-430   | Bicycle Safety                                | This program combines live-action, animation, and colorful graphics to teach children all about bicycle safety. A friendly bicyclists demonstrates through music videos how to keep safe while riding a bicycle and teaches children the rules of the road.                                                                                                                                                                                                                                           | 10 min    | 2004 | Bicycle safety                                | Y               | N      |
| 1-431   | Securing the Bus Yard: Safety Begins With you | All of us have become increasingly aware of the need for security at schools. This is a by product of the times we live in and security issues must be addressed by every individual that works at schools. This video concentrates on showing what precautionary steps can be taken to ensure the safety of the yard and the buses being stored in it. We offer many suggestions for school bus drivers that have proved effective in deterring many security threats on the bus or in the bus yard. | 20 min    | 2013 | Bus Yard Security                             | N               | N      |

| 1-432   | Unauthorized Rider                    | <p>Unfortunately, in the past few years we've seen a growing trend with unauthorized entry of a school bus.</p> <p>The Minnesota School Bus Operators has teamed with law enforcement and officials to train school bus drivers how to prevent an unauthorized entry on the school bus and using a few law enforcement techniques, school bus driver's who watch this video will gain the confidence to deal with attempts to board their vehicle.</p>                                                   | 7 min                                             | 2013 | <p>*Unauthorized entry of a school bus</p> <p>*Kidnapping</p> <p>*Ransom</p> <p>*Angry parents</p> | N               | N      |
| 1-433   | Safe Practices for Downed Power Lines | <p><b>DRIVERS</b></p> <p>Most power lines run along the roads and are suspended from poles, above the sidewalk and road. If a bus or other vehicle runs off the road, it could hit a power line pole. When this happens, in most instances, the breakers activate and the line is de-energized. But, not always. Sometimes, the line stays live and can energize a vehicle or even the ground.</p> <p><b>STUDENTS</b></p> <p>What to do if your school bus ever comes into contact with power lines.</p> | <p>Driver<br/>11 min</p> <p>Student<br/>5 min</p> | 2014 | Power lines and what happens in an accident                                                        | Y               | N      |

| <b>1-437</b> | <b>Choices: Safe Driving</b>                                                | This year, approximately 30,000 people will die in vehicle collisions. That's 100 today. That's 100 tomorrow and the next. Every Day. Distracted Driving is shattering people's lives. Families are torn apart. Why? Poor choices. We mention choices because that's really what it comes down to - will your employees choose to obey traffic laws and operate their vehicles safely? Or, will they choose to take a chance, a chance that can have grave and long lasting effects. You can help them make good choices behind the wheel with this safety video. | 23 min    | 2014 | *Phone Conversations, Texting Pedestrians, Inclement Weather, Drowsy Driving,<br><br>*Defensive driving techniques relating to: Speed Limits, Following Distance, Intersections, Aggressive Driving, Anticipating Hazards, Backing and Parking. | N               | Y      |

| 1-442   | Knock It Off!                                 | In this program, Odie discusses the concept of calling a “knock it off” immediately when recognizing dangerous behavior, while his friend and fellow fighter pilot Wes Sharp encourages viewers to speak up and tell co-workers to “keep off the grass” when they witness an unsafe act. While recalling personal experiences from their military careers involving “knock it off” and “keep off the grass,” Odie and Wes teach essential lessons that can be applied to any work environment. | 17 min    | Unavailable | *Recognizing dangerous behaviors<br><br>*Telling co-workers when they are engaged in dangerous behaviors.                                                                                                                           | N               | N      |
| 1-443   | What's Your Excuse?                           | Excuses, excuses--we all have given and heard our share of excuses. We often make excuses so fast and with so little thought that we fail to realize how dangerous they can be. This program features many common workplace examples of people using excuses to justify unsafe acts. Our goal is to help viewers recognize risky excuses so they can stop, think and make a better choice.                                                                                                     | 17 min    | Unavailable | Using excuses to justify unsafe acts in the workplace.                                                                                                                                                                              | N               | N      |
| 1-444   | Take Safety Home: Preventing Off-Job Injuries | After working 25 years as a firefighter and paramedic, Martin Lesperance has treated thousands of injuries and medical emergencies. | 1-448   | Vehicle Safety: Being Prepared             | Your vehicle was designed to be safe and keep you secure, but that safety goes to waste if you, as the driver, make poor driving choices. This drivers training safety course prepares your team for a host of possible situations on the road, from breakdowns to bad driving habits. Viewers will also learn about cell phone usage and texting laws, road rage, safe following distance, effective driving habits, addressing distractions, and defensive driving.                                                                                                                       | 15 min    | 2013        | *Preparing for possible safety situations on the road.                             | N               | N      |
| 1-449   | Leading Indicators: It's the Little Things | In this dynamic presentation, Odie discusses his experiences involving shortcuts, snap decisions and complacency as a pilot and how they relate to common workplace situations. Because these leading indicators tend to snowball and contribute to accidents, he stresses that employees must always be aware of the "little things" and take action when they tempt us or our co-workers to perform unsafe acts. While pointing out common safety errors often made by fighter pilots and regular employees alike, Odie emphasizes the lessons all workers can learn from these mistakes. | 27 min    | Unavailable | *Unsafe actions<br>*Safety Errors<br>*Shortcuts<br>*Snap decisions<br>*Complacency | N               | N      |

| <b>1-450</b> | <b>Sexual Harassment on the School Bus: Identifying and Taking Action</b> | Do you know what sexual harassment consists of? Do you know how to react if it takes place on your bus? How can you rely on the school team to help, if harassment takes place on your bus? How could you have prevented it from happening? It's critical for school bus drivers to observe and identify offensive sexual behavior. Drivers can then adopt techniques to effectively intervene. Such techniques can be applied when taking on sexual harassment issues on the bus. | 23 min    | 2016 | *Identify sexual harassment<br>Techniques to intervene. | N               | N      |
| <b>1-451</b> | <b>Driving Fundamentals Intersections, Merging and Lane Changes</b>       | Bus driving fundamentals encompass several different driving situations and techniques. This video focuses on sound driving practices when making lane changes and operating the bus at intersections. We offer several practices that should be utilized when traveling in these highly congested areas.                                                                                                                                                                          | 19 min    | 2016 | *Hazard Awareness                                       | N               | N      |
| <b>1-452</b> | <b>Pre and Post Trip Inspection for School Bus Drivers</b>                | This brand new video gives our most thorough pre trip inspection to date. We go over: inspecting safety equipment, gauges and components, inspecting the exterior and interior of the bus, and the daily brake tests that must be applied. In addition, cover the post trip inspection. This video is a great tool for ALL drivers.                                                                                                                                                | 32 min    | 2015 | *Pre-trip inspection<br>*Post-trip inspection           | N               | N      |

| 1-472   | A Kids Guide to School Bus Evacuations | This brand new video teaches younger aged elementary students (ages 4-8) how to evacuate a school bus. We use vibrant effects to keep students engaged while offering them the important steps to follow if they need to evacuate the bus. We go over general rules, bus evacuation drills, reasons to evacuate and much more.                                                                                                                                                                                                        | 17 min    | 2022 | <ul style="list-style-type: none"> <li>* Steps to follow to evacuate safely.</li> <li>* School bus evacuation drills</li> <li>* Reasons to Evacuate</li> </ul>                                                         | Y               | N      |
| 1-473   | A Kids Guide to Riding the School Bus  | This new animated video is designed to teach kids many safety aspects of riding the school bus. The video follows a couple of friends who are helping each other to stay safe on the way to and at the bus stop. The video also covers what the danger zone is and how children load the bus while staying out of it. We also go over rules while riding the bus and a section for crossing roadways. The videos is directed at elementary and head start aged students from 4-8. It's pace keeps viewers engaged and eager to learn. | 12 min    | 2023 | <ul style="list-style-type: none"> <li>bus stop</li> <li>* Danger Zone - what is it and how to load and avoid getting getting in it</li> <li>* Rules for riding the bus</li> <li>* Crossing roadways safely</li> </ul> | Y               | N      |
